RE: Cobb County Government Climate Pollution Reduction Grant Program

To Whom It May Concern:

I am writing to express Cobb County Government's interest and willingness to participate as a Coalition member of the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities*, for the Environmental Protection Agency's Climate Pollution Reduction Grants (CPRG) program. Cobb County Government is a founding member of the Atlanta EV Alliance coalition. The Atlanta EV Fleet Alliance project aims to significantly lower greenhouse gas emissions in the transportation sector by phasing out aging government vehicles, introducing zero emissions electric vehicles, and installing electric vehicle (EV) charging infrastructure in nine localities across the Atlanta metropolitan region.

Cobb County Government is a thriving, innovative, and safe community that enhances quality of life for the well-being of all. Our mission is to "make Cobb County the best place to live and work through an efficient, effective and responsive government that delivers quality services". We are committed to this project because it aligns with our County-wide Strategic Plan Outcome Areas of Sustainable Development, Enhanced Mobility & Connectivity, and Enhanced Transportation Infrastructure. This project will allow us to provide a healthier and cleaner environment for our community members through the reduction of greenhouse gas emissions and climate pollution, and it will improve the quality of lives of all our community members.

If awarded funding, Cobb County Government will work to carry out CPRG project activities and collaborate with Coalition members. Such collaboration will clearly document and describe the agreed-upon roles, responsibilities, contributions, resources, and commitments each partner will provide to ensure project success, as well as the coalition's operating model and statement of accountability to the Environmental Protection Agency. Our participation in the Atlanta EV Fleet Alliance project will help ensure its success by participating in the Coalition task force, actively documenting, and sharing our lessons with other members throughout the project, sharing our sustainable fleet transition and sustainability project management knowledge and experience on EV fleet transitions.

Kindly give the Atlanta EV Fleet Alliance application the highest consideration for funding.

Sincerely,

Lisa N. Cupid  
Chairwoman

RE: City of Douglasville, Georgia commits to the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project

Dear. Mr. Vazquez,

I am writing to express City of Douglasville, Georgia's commitment to participate as a coalition member of the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project. City of Douglasville, Georgia also commits to sign a Memorandum of Agreement (MOA) for the Clayton County Government's coalition application to the US Environmental Protection Agency (US EPA) Climate Pollution Reduction Grant (CPRG) if the project is approved. The *Atlanta EV Fleet Alliance* project aims to significantly lower greenhouse gas emissions (GHG) in the transportation sector by phasing out aging government vehicles, introducing zero emissions electric vehicles, and installing EV charging infrastructure in 9 localities across the Atlanta metropolitan region.

The City of Douglasville, Georgia is committed to this project because it will help us meet organizational and environmental objections such as reducing greenhouse gas emissions, reducing pollution, lowering operating costs, and improving local air quality. The project promotes environmental stewardship and allows us to lead by example to better provide for the health, safety, and welfare of our residents.

Our participation in the project will help ensure its success by actively participating in the coalition task force, sharing knowledge and challenges with other members of the project, organizing our project team to ensure documentation, research, evaluation and planning are part of our overall strategy.

The City of Douglasville, Georgia was a founding member of the Atlanta EV Alliance coalition. If awarded funding, we will work with the Clayton County Government and Coalition members to carry out the project activities outlined within the CPRG grant proposal and MOA. The MOA will clearly describe the agreed-upon roles, responsibilities, contributions, resources, and commitments each partner will provide to ensure project success, as well as the coalition's operating model and statement of accountability to US EPA.

RE: The City of East Point commits to the Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities Project.

Dear Mr. Vazquez:

I am writing to express the City of East Point's commitment to participate as a coalition member of the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project.

The City of East Point also commits to sign a Memorandum of Agreement (MOA) for the Clayton County Government's coalition application to the US Environmental Protection Agency (US EPA) Climate Pollution Reduction Grant (CPRG) if the project is approved. The Atlanta EV Fleet Alliance project aims to significantly lower greenhouse gas emissions (GHG) in the transportation sector by phasing out aging government vehicles, introducing zero emissions electric vehicles, and installing EV charging infrastructure in 9 localities across the Atlanta Metropolitan Region.

The City of East Point is a quaint, and ethnically diverse urban and friendly community that offers the full amenities of in-town living. The City attracts everyone from young professionals to active adults and boasts over 25 unique and affordable historic neighborhoods. East Point is increasingly becoming a popular live, work and play area, and is a warm and welcoming place for people of all ages, races, and cultures. The City has a fleet of over 500 vehicles which, when operated, leaves a vast carbon indentation of the environment. Gas vehicles emit carbon monoxide, formaldehyde, and several other pollutants that can distress the body and contribute to health problems. We are committed to this project because our citizens will benefit from cleaner air, thus immediately improving their quality of life.

Our participation in the project will help ensure its success by:

- Expanding the communities that are working on reducing greenhouse gas emissions and other harmful pollutants,
- Serving as an example to other urban municipalities our size who want to provide clean air, thereby improving the health of residents,

**City of East Point**

2757 East Point Street East Point, Georgia 30344 | 404-270-7001 | [www.eastpointcity.org](http://www.eastpointcity.org)

- Becoming a leader to other businesses in the community by embracing new and emerging technology for EV fleet transitions.

The City of East Point was a founding member of the Atlanta EV Alliance Coalition. If awarded funding, we will work with the Clayton County Government and Coalition members to carry out the project activities outlined within the CPRG grant proposal and MOA. The MOA will clearly describe the agreed upon roles, responsibilities, contributions, resources, and commitments each partner will provide to ensure project success, as well as the coalition's operating model and statement of accountability to US EPA.

Please give the Atlanta EV Alliance application the highest consideration for funding.

Sincerely,

A handwritten signature in black ink, appearing to read "Deana", enclosed within a large, loopy oval flourish.

RE: City of Forest Park/Clayton County commits to the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project

Dear Mr. Vazquez,

I am writing to express the City of Forest Park's commitment to participate as a coalition member of the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project. Forest Park, which is located within Clayton County, also commits to sign a Memorandum of Agreement (MOA) for the Clayton County Government's coalition application to the US Environmental Protection Agency (US EPA) Climate Pollution Reduction Grant (CPRG) if the project is approved. The *Atlanta EV Fleet Alliance* project aims to significantly lower greenhouse gas emissions (GHG) in the transportation sector by phasing out aging government vehicles, introducing zero emissions electric vehicles, and installing EV charging infrastructure in 9 localities across the Atlanta metropolitan region.

The City of Forest Park is dedicated to the Atlanta E.V. Fleet Alliance project as it aligns with our values of sustainability and reducing carbon emissions, ultimately enhancing the well-being of our community by fostering cleaner air and a healthier environment for all residents. Additionally, by embracing electric vehicle technology, we aim to lead by example in embracing innovative solutions to combat climate change and create a greener, more resilient future.

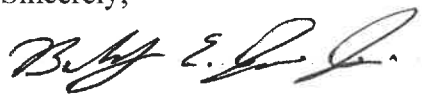

Our participation in the project will help ensure its success as we will participate and be committed to contributing to the coalition task force aimed at accelerating the electrification of local government fleets in the Atlanta metro area. As an active participant, Forest Park will diligently document and share our experiences, insights, and best practices with fellow members. Through this collaborative effort, we aim to facilitate knowledge exchange, training for staff and

foster successful EV fleet transitions, ultimately promoting cleaner air and healthier communities across the region.

The City of Forest Park was a founding member of the Atlanta EV Alliance coalition. If awarded funding, we will work with the Clayton County Government and Coalition members to carry out the project activities outlined within the CPRG grant proposal and MOA. The MOA will clearly describe the agreed-upon roles, responsibilities, contributions, resources, and commitments each partner will provide to ensure project success, as well as the coalition's operating model and statement of accountability to US EPA.

Please give the Atlanta EV Alliance application the highest consideration for funding.

Sincerely,

RE: City of Lovejoy, GA commits to the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project

Dear. Mr. Vazquez,

I am writing to express the City of Lovejoy's commitment to participate as a coalition member of the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project. City of Lovejoy, GA also commits to sign a Memorandum of Agreement (MOA) for the Clayton County Government's coalition application to the US Environmental Protection Agency (US EPA) Climate Pollution Reduction Grant (CPRG) if the project is approved. The *Atlanta EV Fleet Alliance* project aims to significantly lower greenhouse gas emissions (GHG) in the transportation sector by phasing out aging government vehicles, introducing zero emissions electric vehicles, and installing EV charging infrastructure in 9 localities across the Atlanta metropolitan region.

City of Lovejoy, GA is a small city in size, but expansive in progress and desire to best serve the needs of our constituents. We are committed to this project because reducing greenhouse gas emissions is critical to our values, reducing climate pollution and improving the quality of lives

of all our community members is of utmost importance, providing healthier, cleaner air to our disadvantaged communities, and further reducing the impact for the future of our city.

Our participation in the project will help ensure its success by participating in the coalition task force.

The City of Lovejoy was a founding member of the Atlanta EV Alliance coalition. If awarded funding, we will work with the Clayton County Government and Coalition members to carry out the project activities outlined within the CPRG grant proposal and MOA. The MOA will clearly describe the agreed-upon roles, responsibilities, contributions, resources, and commitments each partner will provide to ensure project success, as well as the coalition's operating model and statement of accountability to US EPA.

Please give the Atlanta EVAlliance application the highest consideration for funding.

RE: City of South Fulton's (COSF) commits to the Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities project.

Dear. Mr. Vazquez,

I am writing to express the City of South Fulton's (COSF) commitment to participate as a coalition member of the Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities project. The City of South Fulton also commits to sign a Memorandum of Agreement (MOA) for the Clayton County Government's coalition application to the US Environmental Protection Agency (US EPA) Climate Pollution Reduction Grant (CPRG) if the project is approved. The Atlanta EV Fleet Alliance project aims to significantly lower greenhouse gas emissions (GHG) in the transportation sector by phasing out aging government vehicles, introducing zero-emissions electric vehicles, and installing EV charging infrastructure in 9 localities across the Atlanta metropolitan region.

Partnering with the Atlanta EV Fleet Alliance empowers the City of South Fulton to advance its journey towards clean energy and decarbonization, aligning with our commitment to reduce environmental impact and enhance community well-being. Our city, recognized as one on the rise, is dedicated to optimizing financial resources to deliver efficient services to our residents at the best possible cost. By embracing innovative practices like integrating alternative energy sources such as this transportation-related initiative, we reinforce our vision of becoming a leading, forward-thinking municipality.

We recognize that reducing greenhouse gas emissions is essential to our core values. Moreover, mitigating climate pollution and enhancing the quality of life for all members of our community are paramount objectives. By fostering a shift towards cleaner transportation and energy solutions, we aim to provide healthier, cleaner air, especially to our disadvantaged neighborhoods. This initiative underscores our commitment to sustainability and positions us as a progressive, globally conscious city.

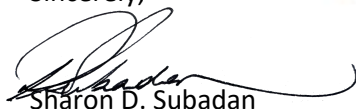

Our involvement in the project is poised to significantly contribute to its success. Drawing upon our distinct expertise in developing fleet replacement plans, siting planning, and preliminary assessments, we aim to implement innovative strategies for installation. Our approach prioritizes reversible, non-permanent techniques, utilizing the most discreet EVE options available to meet charging capacity requirements in minimally visible and non-intrusive locations.

Furthermore, our commitment to actively documenting and sharing our experiences with fellow members will foster a culture of shared learning. By openly discussing both successes and failures, we can collectively accelerate the learning curve, leading to enhanced project performance. This collaborative approach ensures that we capitalize on lessons learned and continuously improve our processes throughout the project lifecycle.

The City of South Fulton was a founding member of the Atlanta EV Alliance coalition. If awarded funding, we will work with the Clayton County Government and Coalition members to carry out the project activities outlined within the CPRG grant proposal and MOA. The MOA will clearly describe the agreed-upon roles, responsibilities, contributions, resources, and commitments each partner will provide to ensure project success, as well as the coalition's operating model and statement of accountability to US EPA.

Please give the Atlanta EV Alliance application the highest consideration for funding.

Sincerely,

Sharon D. Subadan

RE: Union City commits to the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project

Dear. Mr. Vazquez,

I am writing to express Union City's commitment to participate as a coalition member of the *Atlanta EV Fleet Alliance: Accelerating Local Government Fleet Electrification in the Atlanta Metropolitan Area for Cleaner Air and Healthier Communities* project. Union City also commits to sign a Memorandum of Agreement (MOA) for the Clayton County Government's coalition application to the US Environmental Protection Agency (US EPA) Climate Pollution Reduction Grant (CPRG) if the project is approved. The *Atlanta EV Fleet Alliance* project aims to significantly lower greenhouse gas emissions (GHG) in the transportation sector by phasing out aging government vehicles, introducing zero emissions electric vehicles, and installing EV charging infrastructure in 9 localities across the Atlanta metropolitan region.

The City of Union City located within the Atlanta Metropolitan area, stands as an underserved community committed to sustainable growth and environmental stewardship. Despite facing unique challenges, including limited resources, our city remains dedicated to reducing greenhouse gas emission and mitigating climate pollution. Recognizing the disproportionate impact on underserved areas, we prioritize initiatives aimed at promoting cleaner air to enhance the health and well-being of all Union City residents.

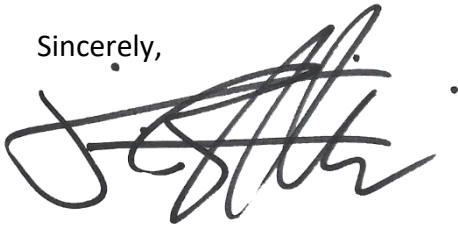

Our participation in the project will help ensure its success by actively immersing ourselves in the coalition task force, openly sharing our past experiences and valuable insights with fellow members and offering our knowledge in transitioning to electric vehicle fleets. Moreover, we are excited about the prospect of collaborating with other coalition members to pioneer inventive strategies and adopt optimal approaches to drive the advancement of electrification efforts in our region.

Union City was a founding member of the Atlanta EV Alliance coalition. If awarded funding, we stand ready to work with the Clayton County Government and Coalition members to carry out the project activities outlined within the CPRG grant proposal and MOA. The MOA will clearly describe the agreed-upon roles, responsibilities, contributions, resources, and commitments each partner will provide to ensure project success, as well as the coalition's operating model and statement of accountability to US EPA.

Please give the Atlanta EV Alliance application the highest consideration for funding.

Sincerely,

A handwritten signature in black ink, appearing to read 'V. Williams', with a large, stylized flourish at the end.

Vince R. Williams  
Mayor, City of Union City
