RE: Letter of Support for Climate Pollution Reduction Implementation Grant (CPRG) – Decarbonize DRCOG Proposal

As the President of Energetics Consulting Engineers, LLC, a local Colorado energy and sustainability consulting firm specializing in both new construction and existing buildings, I am writing to express my wholehearted support for the Climate Pollution Reduction Grant (CPRG) project proposal presented by the Denver Regional Council of Governments (DRCOG). The “Decarbonize DRCOG” initiative encompasses a transformative and holistic approach to regional building decarbonization, which fully aligns with our company’s goals and commitments to mitigating climate change in a pragmatic and feasible way.

I am excited to see that this proposal addresses Denver and the Metro Area’s largest source of GHG emissions – the building sector. It spans the entire region, recognizing that building retrofits, supply chain, workforce, and market transformation transcend municipal borders and require a regional approach. We appreciate that the proposal tackles all barriers to building decarbonization, offering tailored services for home and building owners, industry, and local governments. It not only targets equitable building electrification, but also ensures a focus on Justice40 principles, prioritizing benefits for low-income and disadvantaged communities and will help bring our entire region along in advancing our climate justice and greenhouse gas reduction goals.

We look forward to contributing our expertise, tools, and resources to support the success of this groundbreaking initiative. Should you have any inquiries regarding our support for this funding application, please feel free to contact me.

Sincerely,

Elizabeth Gillmor  
President – Energetics Consulting Engineers, LLC
