RE: Letter of Commitment for Climate Pollution Reduction Implementation Grant (CPRG) - Decarbonize DRCOG

On behalf of the Colorado Green Building Guild (CGBG), we are honored to express our unwavering commitment to actively support the Decarbonize DRCOG grant proposal. With dedication, we pledge to contribute our expertise, resources, and collaborative efforts to ensure the success of this pivotal initiative aimed at addressing climate change and fostering sustainable development within the Denver region.

Founded in 2004 as the Boulder Green Building Guild, CGBG has been at the forefront of promoting sustainable building practices and advocating for the widespread adoption of green building standards across Colorado. Over the years, our organization has evolved into a trusted platform for industry leaders, professionals, policymakers, and community stakeholders to collaborate, innovate, and drive positive change in the built environment.

CGBG's mission is rooted in the principles of sustainability, equity, and community resilience. We understand the critical importance of fostering a thriving green building ecosystem that not only reduces carbon emissions but also promotes social equity and economic opportunity for all. As such, our involvement in the Decarbonize DRCOG initiative aligns seamlessly with our organizational values and overarching goals.

Our commitment to workforce development, industry education, and community engagement is reflected in our ongoing initiatives and programs. Through our Advanced Training Scholarship Program, we have provided critical support to individuals seeking to enhance their skills and certifications in the green building industry. By investing in upskilling and training opportunities, we aim to empower our local workforce, foster innovation, and create pathways to sustainable careers.

In support of the Decarbonize DRCOG initiative, CGBG is prepared to undertake the following actions:

- Participation on the program's Advisory Board, providing industry insight, technical expertise, and guidance for informed decision-making.
- Allocation of staff time and resources to support program administration, outreach efforts, and stakeholder engagement activities.
- Incorporation of program objectives and strategies into municipal planning documents, ensuring alignment with local sustainability goals and priorities.
- Collaboration with community stakeholders to promote equity, diversity, and inclusion within the green building sector, with a focus on addressing systemic barriers and advancing Justice40 principles.
- Sharing of relevant data, resources, and best practices to facilitate knowledge exchange, capacity-building, and collective learning.
- Participation in evaluation mechanisms to assess program outcomes, document impacts, and drive continuous improvement.
- Advocacy for additional funding opportunities and policy support to sustain and expand programmatic efforts over the long term.

Furthermore, CGBG is committed to leveraging our extensive network and community connections to amplify the reach and impact of the Decarbonize DRCOG initiative. Through our trade and industry education programs, technical seminars, hands-on training sessions, and peer-to-peer networking events, we will continue to foster collaboration, innovation, and knowledge-sharing within the AEC industry.

As a non-profit trade organization deeply embedded within the fabric of Colorado's green building community, we are eager to be a part of the transformative potential of the Decarbonize DRCOG initiative. We look forward to working closely with DRCOG, government agencies, community organizations, and other stakeholders to advance our collective climate mitigation efforts and build a more sustainable, equitable future for all.

Should you require any further information or clarification regarding our commitment to this funding application, please do not hesitate to contact us.

Sincerely,

*Shannon Wehner*
