RE: Letter of Support for Climate Pollution Reduction Implementation Grant (CPRG) - Decarbonize DRCOG Proposal

As Elephant Energy, representing a regional business dedicated to making it easy for homeowners to upgrade their homes to be more climate-friendly, we are writing to express our support for the Climate Pollution Reduction Grant (CPRG) project proposal presented by the Denver Regional Council of Governments (DRCOG). The "Decarbonize DRCOG" initiative encompasses a transformative and holistic approach to regional building decarbonization, and we believe it aligns seamlessly with Elephant Energy's commitment to reducing local carbon emissions.

Elephant Energy fully supports the Decarbonize DRCOG proposal for several compelling reasons. First, as a company dedicated to facilitating homeowners' transition to modern electric technologies, we recognize the urgency of addressing climate change within the built environment. This proposal directly targets the largest source of greenhouse gas emissions in Denver and the Metro Area – the building sector. By prioritizing building decarbonization, the initiative aligns with our mission to promote sustainable energy solutions and reduce carbon emissions.

Moreover, Elephant Energy is committed to fostering collaboration and innovation within the industry. The Decarbonize DRCOG proposal offers an inclusive and collaborative platform that spans the entire region, bringing together stakeholders from various sectors to drive meaningful change. We believe that by working together, we can leverage our collective expertise and resources to accelerate the adoption of energy-efficient technologies and practices.

In conclusion, Elephant Energy is proud to endorse the Decarbonize DRCOG proposal and stands ready to support its implementation. We believe that this initiative represents a critical step towards achieving our collective climate goals and building a more sustainable future for our community.

Sincerely,

DR Richardson
Co-Founder, Elephant Energy
