

Project Location

The Project is located in East San Diego County, California. The Project will create up to 11.5 million gallons of purified water per day, and will serve an estimated 500,000 people. This equates to roughly 30% of East San Diego County's water supply. This water will flow from the faucets of customers in Padre Dam Municipal Water District, Helix Water District and Lakeside Water District service areas as well as the northern portion of Otay Water District's service area (map below).
