RE: Xcel Energy Letter of Support- Climate Pollution Reduction Grant (CPRG) application

Xcel Energy's carbon emissions reductions are expected to exceed 80% by 2030 and positions us well to achieve the clean energy goals of our Upper Midwest states. Our Upper Midwest system delivers increasingly clean energy to all of the states we serve in the region—Minnesota, Wisconsin, North Dakota, South Dakota and Michigan.

To that end, Xcel Energy supports the City of Fargo's effort for their CPRG grant application. Xcel Energy is represented on Fargo's Sustainability and Resiliency Committee. Through our leadership and other local initiatives, we are proud to support and advance the goals of the communities we serve.

The CPRG grant would be an avenue for us to continue to work with the Fargo community members to explore energy-related solutions. Further, we are supportive of partnering with the city to host neighborhood meetings to discuss energy efficiency, LED streetlights, and other energy-related activities. Xcel Energy is open to exploring future partnerships with the city in the areas of energy efficiency and climate resiliency.

Thank you for considering this important application.

Please let us know if additional information is required.

Sincerely,

*Tony Grindberg*
