**RE: Proposed changes to the labels for methomyl, EPA Reg. Numbers 61842-52, 61842-53, 61842-54, 61842-55.**

Dear Ms. Eberius:

Tessenderlo Kerley, Inc. (TKI) holds U.S. Environmental Protection Agency (EPA) registrations for methomyl technical and certain end-use products in the United States. This communication provides a commitment from TKI to voluntarily amend the terms of its methomyl technical product registration and all relevant TKI methomyl-containing end-use product registrations to allow for the species-specific measures referenced in the U.S. Fish and Wildlife Service email from Nancy Golden dated December 19, 2024. This will allow revision of the Description of the Action being considered in the ongoing endangered species consultations with the FWS. TKI is committed to making these EPA-proposed label modifications with the understanding that additional end-user mitigation options may be added as they become available. We look forward to continued discussions with the EPA, FWS, and USDA in completing and implementing this Biological Opinion.

If you have any questions or require additional information, please contact me.

Sincerely,

A handwritten signature in blue ink that reads "Kevin Henry".

Kevin Henry, Ph.D.
