RE: Letter of Support for the Climate Pollution Reduction Grant proposal,
"Implementation of Partial Denitrification with Anammox (PdNA) in
Wastewater"

Hampton

Dear Mr. Bernas:

Isle of Wight

James City

The Hampton Roads Planning District Commission (HRPDC) fully supports HRSD's project, "Implementation of Partial Denitrification with Anammox (PdNA) in Wastewater" to reduce greenhouse gas emissions (GHGs) in our region. This project is included in the HRPDC Priority Climate Action Plan for the Hampton Roads Region of Virginia.

Newport News

Norfolk

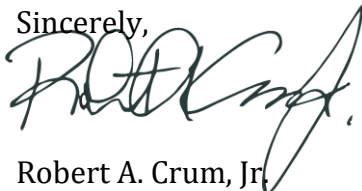

HRPDC and HRSD have been active participants in the development of carbon reduction strategies. We understand the need to provide our communities with a healthier environment to live, work, and recreate. This viable wastewater treatment solution will reduce GHGs through significant chemical and energy reductions.

Poquoson

Portsmouth

Sincerely,

Smithfield
