RE: Support for the Association of Central Oklahoma Governments (ACOG) EPA CPRG
Implementation Grant Application

To Whom It May Concern:

The South central Partnership for Energy Efficiency as a Resource (SPEER) is pleased to submit this letter in support of INCOG's application for a CPRG Implementation Grant award. We support INCOG's approach to manage an Implementation Grant award through the selection of sub-recipients for high-impact projects reducing our region's greenhouse gas (GHG) emissions outlined in INCOG's Priority Climate Action Plan (PCAP). INCOG has the trust, working knowledge, and established network of stakeholders to successfully lead successful execution of emissions reduction projects.

By promoting improved code compliance across Oklahoma through education and outreach, SPEER is in a constructive position to help optimize energy efficiency, durability, and affordability. Our work within building code training and improved implementation will be coupled with INCOG's ability to deliver quality and focused training to their service territory. As the leader in code related activities and local governments outreach, SPEER is primed to help INCOG lead their initiatives forward.

INCOG is providing the necessary strategic support through guidance in the PCAP. We look forward to implementing these critically important projects to foster regional resiliency and mitigate the impact of climate change.

SPEER is excited to help in the collaboration and the expected outcomes of the proposed projects.

Todd

Sincerely,
Todd McAlister
Executive Director
SPEER
