RE: Priority Climate Action Plan Application

Dear Ms Griggs,

On behalf of the Bluegrass Climate Action Team (BCAT), we support the proposed Priority Climate Action Plan work program. It will greatly facilitate our planned local climate vulnerability assessment of the Bluegrass Region, thus encompassing the whole PCAP study area and too, help shape city policies in achieving it's GHG emissions reduction goal.

The resulting PCAP study data will be invaluable in our local assessment and goal setting of a corresponding climate resilience plan to best prepare for local, extreme climate impacts; including but not limited to severe heat waves, supply-chain interruptions, first-responder preparedness, and potential mass in-migration of climate refugees seeking safer climes in the Bluegrass Region, etc.

Likewise, I commit to serve as a reviewer of all draft PCAP deliverables. I may also be available for greater participation in the PCAP team process.

Please contact me if you have any questions or need more information.

Sincerely,

Henry Jackson
