March 18, 2024

Dear Ms. Griggs,

I am writing to state our support of the City of Lexington's implementation grant as part of the MSA Climate Pollution Reduction Planning program. As you know, Bluegrass Greensource (BGGs) has been working in Central Kentucky, including the six counties identified for your project, for more than 23 years. Our experience and connection throughout the region will help as you move toward creating an implementation plan.

During your program, Bluegrass Greensource looks forward to helping develop an outreach and engagement strategy and assisting with public input and engagement meetings. BGGs can also help with promotion by sharing public meetings through our social media and electronic newsletter.

This project will benefit our region and its residents by engaging our communities in creating an action plan for real change. We look forward to working with you on this, and other climate related projects in the future.

Sincerely,

Amy Sohner
Executive Director
