

Climate Pollution Reduction Grants Program: Implementation Grants

Reducing Emissions in Maine's Buildings & Transportation Systems: Accelerating Climate Progress Equitably throughout a Rural State

Optional Supporting Materials

The following reports, roadmaps, research studies, and other documents are referenced in Maine's CPRG Workplan Narrative to support and inform each of the state's greenhouse gas reduction measures.

Maine Won't Wait: A Four-Year Climate Plan for Action (December 2020) Maine Won't Wait is Maine's four-year climate plan packed with actionable strategies and goals to emit less carbon, produce energy from renewable sources and protect our natural resources, communities and people from the effects of climate change.

https://www.maine.gov/climateplan/sites/maine.gov.climateplan/files/inline-files/MaineWontWait_December2020_printable_12.1.20.pdf

Maine Climate Council Annual Report: Tracking the Progress of Maine Won't Wait (December 2023) An update to the 2020 Climate Action Plan, the 2023 progress report take stock of what the plan has helped Maine achieve so far, and looks to the future, as the Maine Climate Council begins its work to deliver an updated climate action plan by December 1, 2024. Highlights include progress on heat pump installations and EV rebates issued to low and moderate income individuals.

https://www.maine.gov/future/sites/maine.gov.future/files/2023-12/2023_MWW%20Progress%20Report.pdf

Maine Energy Plan: Pathway to 2040 (August 2023) The Governor's Energy Office is starting a planning effort for achieving the use of 100 percent clean energy in Maine by 2040. The "Maine Energy Plan: Pathway to 2040" will engage the public and key energy stakeholders on actionable and affordable strategies to meet this target, such as through diversifying energy sources in Maine, stabilizing electricity rates, reducing emissions, and supporting jobs and economic investment.

<https://www.maine.gov/energy/studies-reports-working-groups/current-studies-working-groups/energyplan2040>

Final Recommendations of the Equity Subcommittee (March 2023) Following two years of deliberations (2021-2023), the Equity Subcommittee of the Maine Climate Council adopted its final recommendations for submission to the Council. These recommendations help ensure that all Maine people can benefit from climate action.

https://www.maine.gov/future/sites/maine.gov.future/files/inline-files/Maine%20Climate%20Council_Equity%20Subcommittee%20Final%20Report_March%202023.pdf

Maine Social Vulnerability Index: The Maine Social Vulnerability Index (MSVI) is available to help identify where vulnerable populations are located and what factors drive those vulnerabilities. The MSVI is based on 17 socioeconomic and demographic indicators taken from US Census data. The MSVI is a customized version of the US Centers for Disease Control's social vulnerability index. The MSVI calculates the percentage of the population within each census block group for each indicator. The MSVI supports communities in decision making that improves the resiliency of the whole community by addressing the needs of the underserved. The MSVI is a tool that can be used to help inform planning processes, allocation of resources, and policy and program development by bringing the elements of

social vulnerability into the calculus. It provides detail at the census block group level as well as providing a way to assess social vulnerability between census block groups and across larger regions of Maine. As a resource, the MSVI is intended to complement local level knowledge of a community's vulnerabilities.

https://www.maine.gov/future/sites/maine.gov.future/files/inline-files/SVI%20Communities%20Map%20and%20List_2021-12-01_1.pdf

Priority Community Engagement: GOPIF has contracted with the University of Maine on behalf of the Maine Climate Council to help coordinate community engagement with low-income and disadvantaged communities in the state's current climate action planning process. Table 1 from the scope of work highlights the priority communities and community organization partners the University of Maine is focused on. See UMaine engagement outreach plan at the end of this document.

Measure 1: Public schools and municipal buildings serving low-income and disadvantaged communities in Maine will be able to apply for funding through the Community Resilience Partnership and Green Schools Program for energy efficiency, clean energy and decarbonization measures to reduce GHG emissions.

Community Resilience Partnership Annual Report (December 2023) The Community Resilience Partnership (the Partnership) provides grants and technical assistance to Maine communities to help them identify and address local priorities to reduce greenhouse gas emissions, transition to clean energy, and become more resilient to climate effects such as extreme storms, flooding, rising sea levels, and threats to public health.

<https://www.maine.gov/future/sites/maine.gov.future/files/inline-files/2023%20CRP%20Annual%20Report.pdf>

Energy Efficiency and Conservation Block Grant Program Request for Application (January 2024) Eligible state, local, and Tribal governments are invited to apply for \$430 million in funding for projects and programs that cut carbon emissions, improve energy efficiency, and reduce energy use.

<https://www.energy.gov/scep/eeecbg-program-formula-grant-application-hub>

The Role of State Networks in Advancing Community-initiated and -engaged Sustainable Energy Action in Underserved Communities (June 2023) Researchers at the University of Maine were awarded a \$1.125 million US EPA STAR grant focused on understanding the role of statewide networks of communities taking action on sustainable energy in advancing community-driven sustainable energy solutions by underserved populations – with a special focus on indigenous and other rural, remote, low-income populations (summary available in supplemental materials). This concurrent 4-year project involves annual surveys, interviews education workshops and group discussions in 10-14 underserved communities in Maine listed as “high” on Maine’s SVI.

<https://docs.google.com/document/d/119Gue-jlqwIRUTmAg5oIMDIPxwDYgDdMOT9NJLDxNul/edit>

Schools with oil tanks – mitigation: The Underground Oil Storage Tanks (UST) program at Maine DEP has identified 214 registered heating oil USTs at Maine schools. Please see list at the end of this document. The first 14 USTs listed are very old single-walled tanks and pose a significant threat to those schools with onsite drinking water supplies and the environment. Some of these single-walled tanks are also CP steel and at risk of internal corrosion.

In addition, Maine Emergency Management Agency was able to provide a list of schools with Aboveground Storage Tanks (ASTs) from 2022 (2023 is in process). The attached spreadsheet identifies approximately 38 schools with ASTs.

Measure 2: Efficiency Maine Trust will expand incentives and consumer education for light-duty electric vehicle (EV) purchase and operation by low-moderate income households and communities.

Recharge Maine (March 2024) Recharge Maine is the state's initiative to create a convenient, reliable, and accessible EV charging network to enable EV drivers to travel across the State, from north to south and east to west. Recharge Maine helps to identify which DC Fast Charging stations have been funded by the state and are held to strict performance requirements, including an uptime of greater than 97%.

<https://atlaspolicy.com/rechargemaine/>

Maine Plan For Electric Vehicle Infrastructure Deployment (Maine PEVID) (July 2022) The Maine PEVID, submitted to the Federal Highway Administration in July 2022, outlines Maine's strategy for expanding its electric vehicle (EV) charging infrastructure and reducing transportation emissions.

<https://www.maine.gov/mdot/climate/docs/pevid-2022.pdf>

Maine Clean Transportation Roadmap (December 2021) The Clean Transportation Roadmap—a specific action of *Maine Won't Wait*—identifies the policies, programs, and regulatory changes needed to continue decarbonizing Maine's transportation sector in the coming years.

<https://www.maine.gov/future/sites/maine.gov.future/files/inline-files/Maine%20Clean%20Transportation%20Roadmap.pdf>

Measure 3: Efficiency Maine Trust will pilot Medium- and Heavy- Duty zero-emissions vehicle rebates, covering up to the incremental cost of purchase of the electric vehicle and supporting associated infrastructure. Transportation emissions are nearly half of Maine's emissions, and to date, no registered trucks are electric.

Request for Proposal: Developing a Clean Transportation Roadmap for Medium and Heavy-Duty Vehicles (August 2023) The purpose of the Clean Transportation Roadmap for MHDV is to identify necessary policies, programs, market drivers, utility investments, and regulatory changes needed to meet the state's transportation emission reduction goals.

<https://www.maine.gov/tools/whatsnew/attach.php?id=11737992&an=1>

Efficient Maine Retail/Residential Technical Reference Manual (January 2024) The Efficiency Maine Trust Retail/Residential, Commercial/Industrial and Multifamily Technical Reference Manuals (TRMs) provide documentation for the Trust's calculation of energy and demand savings from energy-efficiency measures. Each TRM serves as a central repository and common point of reference for the methods, formulas, assumptions and sources that are used to estimate savings from energy-efficiency measures, and provides a common platform for analyzing energy savings across measures and programs. The importance of the TRM is derived from the importance of energy and demand savings calculations, which are at the foundation of the Trust's program planning and management, cost-effectiveness analysis, program evaluation, Annual Report and Independent System Operator – New England (ISO-NE) Forward Capacity Market (FCM) participation.

https://www.energymaine.com/docs/EMT-TRM_Retail_Residential_v2024_3_.pdf

Measure 4: Extend the State’s rural workforce commuting pilot program with electric vehicles by expanding a successful pilot through Maine Department of Transportation.

Workforce Transportation Program (May 2022) The Workforce Transportation Program provides competitive grants to local and regional partnerships piloting ways to connect workers and employers through ridesharing, vanpools, and other subsidized transit options. In addition to supporting transportation of workers from rural areas to more urban centers of employment, a portion of funds will be targeted specifically to connecting workers in rural areas to employment opportunities in rural areas.
<https://www.maine.gov/jobsplan/program/workforce-transportation-program>

Workforce Transportation Program Awards Announcement (June 2023) Governor Janet Mills announced nearly \$1 million in Maine Jobs & Recovery Plan grants for innovative workforce transportation projects aimed at supporting employers in York and Oxford counties, as well as enhancing existing transportation options for workers in Lewiston-Auburn.
<https://www.maine.gov/governor/mills/news/governor-mills-announces-nearly-1-million-maine-jobs-recovery-plan-grants-workforce>
