RE: Letter of Intent for Funding Opportunity Number EPA-R-OAR-CPRGI-23-07

U.S. Environmental Protection Agency:

The Massachusetts Clean Energy Center (MassCEC) submits this Letter of Intent as part of the Massachusetts Department of Energy Resources' (MA DOER) coalition application for a Climate Pollution Reduction Grant (CPRG) Implementation Grant, submitted in response to Funding Opportunity Number EPA-R-OAR-CPRGI-23-07.

MassCEC is dedicated to accelerating the growth of the clean energy and climatetech sector across the Commonwealth of Massachusetts, spurring job creation, delivering statewide environmental benefits and securing long-term economic growth for the people of Massachusetts. Starting in January of 2024, MassCEC began actively participating in a multi-agency working group convened by MA DOER to design and prepare MA DOER's coalition application for a CPRG Implementation Grant, which is for a collective program effort being referred to as the "Massachusetts Comprehensive Fleet Electrification Initiative." MassCEC has worked closely with the working group to design the proposal contained in the coalition application. Under the proposal, MassCEC will design and administer a one-stop-shop online portal for the various programs and offerings supported by the Initiative. MassCEC will continue to administer the Mass Fleet Advisor Program, increasing support tools for fleets as they prepare for electrification.

As required by the Notice of Funding Opportunity for the CPRG Implementation Grant (CPRG NOFO), MassCEC intends to execute a Memorandum of Agreement that complies with Appendix E of the CPRG NOFO with MA DOER and the Massachusetts Department of Environmental Protection by July 1, 2024.

If you have any questions regarding this Letter of Intent, please contact Rachel Ackerman, MassCEC's Program Director for Clean Transportation via email (rackerman@masscec.com) or by phone (617-315-9326).

Sincerely,

A handwritten signature in blue ink, appearing to read 'Emily Reichert'.

Dr. Emily Reichert
