Katrina Kessler, Commissioner  
Minnesota Pollution Control Agency  
520 Lafayette Road  
Saint Paul, MN 55155

Subject: Fond du Lac Tribal and Community College's Support of the State Minnesota's CPRG Coalition  
Proposal for Equitable Residential Decarbonization (Award Number EPA-R-OAR-CPRGI-23-07)

Dear Commissioner Kessler,

Fond du Lac Tribal and Community College (FDLTCC) plans to partner with the State of Minnesota, including the Minnesota Pollution Control Agency and other state agencies involved in the proposal, to implement the suite of equitable residential decarbonization programs in your agency's proposal.

We are excited to have this proposal moving forward as a coalition because we see the work of residential decarbonization happening most effectively as a collaboration between state and local governments with support from community-based groups. Local government connects more effectively with individual community members to move forward on individual implementation while state government can more effectively provide backbone support and programming to foster learning and scale impact.

We anticipate participating in the proposed work through active engagement in developing and refining programming to effectively deliver on the purpose of ensuring low-income and disadvantaged communities are centered and prioritized in the work of decarbonizing all homes in Minnesota. At a minimum, this means we will:

- actively participate in the four annual convenings described in the proposal,
- share information and resources from state and local government into the communities we serve to build awareness about programs and home decarbonization opportunities,
- share information from the communities we serve to state program staff and relevant local government staff as part of program development and to improve programming and results over time.
- Contribute in specific ways identified through our engagement with this process and work.

Fond du Lac Tribal and Community College is a unique institution and the only College in the nation that is co-governed by both the Fond du Lac Band of Lake Superior Chippewa and the State of Minnesota. The equitable residential decarbonization work is exciting because it aligns with our mission, which is "to provide higher education opportunities for its communities in a welcoming, culturally diverse environment." FDLTCC is also a Building Performance Institute approved training and testing site, providing training for people interested in working in the energy auditing field.

I am confident FDLTCC will be a strong partner and can assist in moving forward this important work for our communities.

Sincerely,

Anita Hanson, President  
Fond du Lac Tribal and Community College
