Katrina Kessler, Commissioner
Minnesota Pollution Control Agency
520 Lafayette Road
Saint Paul, MN 55155

Subject: Slipstream Support of the State Minnesota's CPRG Coalition Proposal for Equitable Residential Decarbonization (Award Number EPA-R-OAR-CPRGI-23-07)

Dear Commissioner Kessler,

Slipstream plans to partner with the State of Minnesota, including the Minnesota Pollution Control Agency and other state agencies involved in the proposal, to implement the suite of equitable residential decarbonization programs in your agency's proposal.

We are excited to have this proposal moving forward as a coalition because we see the work of residential decarbonization happening most effectively as a collaboration between state and local governments with support from community-based groups. Local governments connect more effectively with individual community members to move forward on individual implementation while state government can more effectively provide backbone support and programming to foster learning and scale impact. And all of this effort is more likely to have the right impacts when in partnership with community-based organizations.

We anticipate participating in the proposed work through active engagement in developing and refining programming to effectively deliver on the purpose of ensuring low-income and disadvantaged communities are centered and prioritized in the work of decarbonizing all homes in Minnesota. At a minimum, this means we will:

- Actively participate in the four annual convenings described in the proposal,
- Share information and resources from state and local government into the communities we serve to build awareness about programs and home decarbonization opportunities,
- Share information from the communities we serve to state program staff and relevant local government staff as part of program development and to improve programming and results over time.
- Contribute in specific ways identified through our engagement with this process and work

Slipstream is excited about equitable residential decarbonization work. It aligns with our mission to accelerate climate solutions for everyone. On this project we have the opportunity to appropriately incorporate both procedural and distributional equity in partnership with the communities on the team. Slipstream brings our manufactured home retrofit and weatherization training and technical expertise to support contractor capacity building to improve manufactured homes, an important source of affordable housing.

Sincerely,

Scott Hackel
Vice President of Research
