Stephen M. Hall
Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102

Mr. Hall,

MPUA-MEC is pleased to partner as a subgrantee for the Missouri Department of Natural Resources' Air Pollution Control Program's Implementation Grant application under the Climate Pollution Reduction Grant (CPRG) program. This letter serves as a commitment to serve as the subgrantee responsible for overseeing the implementation, management, and reporting requirements for the projects listed in the table below.

Project Description	Location	Total Anticipated Project Cost	CPRG Grant Funding Requested	Max Percent Covered by CPRG Grant
MPUA-MEC Subgrantee Administrative costs (personal service, fringe, travel, indirect, contractual, etc.)	N/A	\$4,980,091	\$4,980,091	100%
MPUA-MEC will lead, administer, construct, and own solar farms for the direct benefit of small communities with municipal electric utilities – 33 MW	Various	\$66.4 million	\$32.2 million	50%
2 – 1 MW, 4-hour batteries to replace diesel generation at Macon and Marshall Municipal Utilities	Macon and Saline Counties	\$5 million	\$2.5 million	50%

We understand that if the department is selected to receive funding, the grant funding requested in the department's grant application for each project will cover the lesser of the total funding requested above or the maximum percentage of the total actual project cost. We are committed to securing other funding sources and/or using

improving local quality of life through hometown utilities

2200 Maguire Boulevard

fax 573-445-0680
MPUA.org

our own funding to cover the portion of the total project costs that are not covered by the CPRG grant funds.

We understand the department has not yet been awarded funding for this project. If the department is selected to receive funding, the department will notify us and develop a financial assistance agreement that both parties must execute. The agreement will define the scope of work, award period, reporting requirements, and all terms and conditions of the subgrant. We understand that any costs incurred prior to the award start date in our financial assistance agreement with the department will not be eligible for reimbursement through the grant.

We also understand that if the department's application is not selected to receive funding, then we will be under no commitment to implement or oversee the project. We are excited to join with you as a project partner on this important work.

Sincerely,

Stephen M. Hall
Air Pollution Control Program Director
Missouri Department of Natural Resources
P.O. Box 176, Jefferson City, MO 65102

Dear Stephen Hall:

I would like to thank the Missouri Department of Natural Resources for our ongoing collaboration and coordination on the Climate Pollution Reduction Grant (CPRG) Program. Our respective Priority Climate Action Plans encompass community priorities in metro Kansas City and across the state of Missouri in mutually supportive ways. And our CPRG implementation grant applications complement each other in a variety of important ways.

Developed in coordination with our region and others across the state, the Missouri CPRG implementation grant application will conserve air pollution, create high-quality jobs, spur economic growth, and enhance the quality of life for all Missourians. We also support Missouri's participation in two potential multi-state coalition applications - the Cement Coalition led by the state of Wisconsin and the Resiliency Coalition led by the state of Hawaii. Extensive coordination has equipped all agencies to optimize the efficiency of investments and avoid the duplication of measures.

If both MARC and the state of Missouri are selected for CPRG implementation grants, we would look forward to regularly sharing progress and exploring opportunities for collaboration. We will also establish procedures to prevent duplicative funding to projects from two different CPRG implementation grant awards, ensuring compliance with EPA.

We look forward to continued collaboration with MDNR as we move forward into PCAP implementation and comprehensive climate plan development.

Sincerely,

March 25, 2024

Stephen M. Hall
Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102

Mr. Hall,

The Office of Administration, Division of Facilities Management, Design and Construction (FMDC) is pleased to be included as a project partner in the Missouri Department of Natural Resources' Air Pollution Control Program's Implementation Grant application under the Climate Pollution Reduction Grant (CPRG) program. This letter serves as support to implement the project described below if the Environmental Protection Agency (EPA) selects the department's application to receive an award.

With this EPA grant, FMDC plans to fund projects to upgrade state facilities and improve energy efficiency. These planned projects include ten HVAC replacements, fourteen building window replacements, and seventeen solar installations. These improvements to energy efficiency in state office buildings will reduce the energy burden to our Missouri citizens while promoting energy efficiency and providing environmental benefits to the communities they serve.

We are excited to join with you as a project partner on this important work.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Yansen", with a long horizontal flourish extending to the right.

Brian Yansen

Director Stephen Hall
PO Box 176
Jefferson City, MO 65102

Dear Director Hall,

I am writing in support of a grant application for the Refuse 2 Energy, Inc. project, which would eliminate the need for landfill use and create a renewable source of base load power. The facility will be located in Perry County, Missouri, and will have the ability to convert 500 tons of solid waste per day into renewable energy. This facility will divert 174,000 tons of municipal solid waste per year from landfills, the equivalent of the amount of waste generated by 200,000 Missouri residents. Proprietary technology developed over a period of many years will be deployed in Perry County to accomplish these metrics.

One of my most important responsibilities as congressman is to support economic development in southeast Missouri. Along with accomplishing an important goal of deploying a renewable energy source that will complement existing base load power generation, the project will support approximately 100 jobs during facility construction and create 30 new, well-paying jobs with benefits once the facility is in operation. These jobs will be skilled labor positions that will pay above the county average wage amount. The contribution to the regional economy will be significant.

I am in support of this project and urge you to give it full consideration.

Sincerely,

Jason Smith

Stephen M. Hall
Air Pollution Control Program
P.O. Box 176
Jefferson City, MO 65102

Mr. Hall,

Forest ReLeaf of Missouri is pleased to be included as a project partner in the Missouri Department of Natural Resources' Air Pollution Control Program's Implementation Grant application under the Climate Pollution Reduction Grant (CPRG) program. This letter serves as a commitment to implement the project described below if EPA selects the department's application to receive an award.

Project Description	Location	Total Anticipated Project Cost	CPRG Grant Funding Requested	Max Perc Covered CPRG Gr
Expansion of the CommuniTree Program – add 3,000 trees per year	Various	\$750,000	\$675,000	90%

We understand that if the department is selected to receive funding, the grant funding requested in the department's grant application will cover the lesser of the total funding requested above or the maximum percentage of the total actual project cost. We are committed to securing other funding sources and/or using our own funding to cover the portion of the total project costs that are not covered by the CPRG grant funds.

We understand the department has not yet been awarded funding for this project. If the department is selected to receive funding, the department will notify us and explain the next steps in the process to implement the project included in the application. We understand that any costs incurred prior to this notification or prior to the official award state date will not be eligible for reimbursement through the grant.

We also understand that if the department's application is not selected to receive funding, then we will be under no commitment to implement the project. We are excited to join with you as a project partner on this important work.

Sincerely,

Meridith McAvoy Perkins
Executive Director

This letter serves as a commitment to implement the project described below if EPA selects the department's application to receive an award.

Project Description	Location	Total Anticipated Project Cost	CPRG Grant Funding Requested	Max Percent Covered by CPRG Grant
Solar panels and new windows for student housing	Howell County	\$650,000	\$260,000	50%

We understand that if the department is selected to receive funding, the grant funding requested in the department's grant application will cover the lesser of the total funding requested above or the maximum percentage of the total actual project cost. We are committed to securing other funding sources and/or using our own funding to cover the portion of the total project costs that are not covered by the CPRG grant funds.

We understand the department has not yet been awarded funding for this project. If the department is selected to receive funding, the department will notify us and explain the next steps in the process to implement the project included in the application. We understand that any costs incurred prior to this notification or prior to the official award state date will not be eligible for reimbursement through the grant.

We also understand that if the department's application is not selected to receive funding, then we will be under no commitment to implement the project. We are excited to join with you as a project partner on this important work.

Sincerely,

Crockett W. Oaks III
