**Re: Letter of Support for the Climate Pollution Reduction Grant (CPRG)**  
**Funding Opportunity Number: EPA-R-OAR-CPRGI-23-07**

Greetings New Mexico Environment Department (NMED),

I am writing on behalf of BayoTech, a leading hydrogen production and distribution company headquartered in New Mexico, to express our wholehearted support for the New Mexico Environment Department's (NMED) major federal grant application for the Climate Pollution Reduction Grant (CPRG) administered by the U.S. Environmental Protection Agency (EPA).

The CPRG represents a crucial opportunity to tackle climate and air pollution while delivering tangible benefits to Low-Income and Disadvantaged Communities (LIDAC) across our state. We commend NMED's commitment to reducing emissions and improving air quality, particularly in communities that are disproportionately affected by environmental issues.

We understand that NMED is seeking funds to implement three key measures outlined in the New Mexico Priority Climate Action Plan (NM PCAP). These measures represent a comprehensive approach to addressing climate change and reducing pollution in our state:

- Clean I-40 Transportation Corridor (NM PCAP Appendix A)
- Clean Truck Incentive Program (NM PCAP Appendix B)
- Efficient & Clean Operations for Schools (NM PCAP Appendix C)

Each of these measures is critical to achieving our collective goals of reducing emissions, improving air quality, and promoting sustainable development in New Mexico. As a company deeply invested in the transition to cleaner energy solutions, BayoTech fully supports NMED's efforts to secure funding for these initiatives.

BayoTech is committed to advancing hydrogen technology as a key component of the clean energy transition. Our innovative hydrogen production solutions offer a sustainable alternative to traditional methods, enabling cleaner transportation through zero-emission hydrogen fuel cell trucks and buses. By supporting NMED's CPRG grant application, we aim to contribute to the broader effort of building a more sustainable and resilient future for New Mexico.

We believe that investing in these measures will not only help mitigate the impacts of climate change but also create new economic opportunities, improve public health, and enhance the overall quality of life for residents across our state. Therefore, we urge the New Mexico Environment Department to prioritize and expedite the submission of the Implementation Grant Application as part of the CPRG grant process.

In conclusion, BayoTech is proud to stand in solidarity with NMED in pursuit of a cleaner, healthier, and more sustainable future for New Mexico. We applaud your leadership and vision in addressing the urgent challenges posed by climate change, and we offer our full support to ensure the success of your grant application.

Sincerely,

A handwritten signature in black ink that reads "CReid". The letters are cursive and fluid, with the first name "Catharine" and last name "Reid" written together.

Catharine Reid
