**Re: Letter of Support for the Climate Pollution Reduction Grant (CPRG)
Funding Opportunity Number: EPA-R-OAR-CPRGI-23-07**

Greetings New Mexico Environment Department (NMED),

Qynergy Corporation stands in support of the Climate Pollution Reduction Grant because the measure will significantly reduce air pollution and help control climate change. It will also generate a great deal of economic activity and transition the workforce in our community to clean energy jobs.

Qynergy Corporation's involvement with the project includes strategic design and implementation of projects by collaborating with various participants through the entirety of the program.

Qynergy Corporation's support will allow NMED to implement the measure more effectively by providing invaluable expertise in the hydrogen ecosystem and by creating synergistic collaborations to enable the hydrogen economy. This will be accomplished by producing affordable hydrogen (at very low life cycle carbon intensity) that is available for non-traditional hydrogen users that are converting/transitioning from fossil-fuel applications. This will enable dramatic reductions in green house gas emissions.

In conclusion, Qynergy Corporation urges NMED to apply for the Climate Pollution Reduction Grant opportunity to support this measure and requests the U.S. Environmental Protection Agency to award the funds to support it.

Sincerely,
