Re: Climate Pollution Reduction Grants – Implementation Grants Letter of Support

Bureau Chief Borchert:

The Hyzon Motors Inc. (“Hyzon”) is pleased to offer this letter of support for your US Environmental Protection Agency’s Climate Pollution Reduction Grant (CPRG) Implementation Grant General Competition coalition application with the New Mexico Environmental Department.

Hyzon is a global supplier of high-performance hydrogen fuel cell technology focused on providing zero-emission power to decarbonize demanding industries. With agile, high-power technology designed for heavy-duty applications, Hyzon is at the center of a new industrial revolution fueled by hydrogen, an abundant and clean energy source. Hyzon focuses on deploying its fuel cell technology in heavy-duty commercial vehicles across North America today and in tomorrow’s power generation and energy storage, mining, construction, rail, marine, and airport ecosystems.

Hyzon believes that the projects outlined therein are critical for kickstarting the transition of heavy-duty diesel fleets to new fuel cell electric zero-tailpipe-emissions technologies in this region. We strongly support the proposal to fund heavy-duty hydrogen fueling infrastructure in New Mexico and Oklahoma and to offer incentives to mitigate the cost differential between diesel and zero-tailpipe-emission trucks. The I-40 Clean Transportation Corridor proposal is a strategic use and efficient use of CPRG implementation dollars that will connect major manufacturing, shipping, and logistics organizations in ultimately from California to the Mid Atlantic and Great Lakes region that are interested in transitioning their fleets to planned hydrogen corridors along Interstate 40 and 44. The proposal will also enable the states to support further the build-out of hydrogen fueling throughout New Mexico and Oklahoma.

We appreciate your leadership and dedication to advancing energy innovation in our state that enhances our energy security, reduces emissions of harmful air pollutants, and supports shared goals for a sustainable and prosperous future. We are eager to support this and ongoing efforts to ensure clean, reliable transportation solutions that benefit our region and the entire country.

Sincerely,
