The Honorable Michael S. Regan
Administrator
United States Environmental Protection Agency
Washington, DC

Re: Orange County CPRG Implementation Application

Dear Administrator Regan:

I am writing to express my unwavering support for Orange County's CPRG Implementation application, the Clean Commute Orange County: The Express Route to Lower GHGs. This project will serve the residents of and visitors to Florida, District 10 and I recognize the substantial impact this project promises in mitigating greenhouse gas emissions within the transportation sector. As documented, transportation and mobile sources account for 40.9% of regional GHG emissions, signifying a critical area for intervention.

The launch of Express Route 301, a collaborative effort with LYNX, marks a significant advancement in our regional goals for environmental sustainability and improved transportation connectivity. Strategically commencing at the new Pine Hill Transfer Center, the route is designed to meet the transportation needs of our community's workforce and the thriving tourist sector.

The mission of Clean Commute Orange County perfectly aligns with the objectives of the CPRG Implementation grant and embodies the principles I advocate for daily. I am confident that this bus service will positively impact our community's sustainability efforts by enhancing air quality, lowering carbon emissions, and providing alternative, more sustainable public transportation options.

Should there be any need for additional support or information to propel the Clean Commute Orange County project forward, please reach out. I am excited about the positive changes this initiative will bring and I look forward to the opportunity to contribute to its success.

Sincerely,

Maxwell Alejandro Frost
Member of Congress
