RE: CarCharge Solar and Energy Storage for NEVI DC Fast Chargers – Exton PA

Dear Ms. Schapira:

My name is Charles Lyddane and I serve as Managing Partner of CarCharge LLC. . I am writing to extend my support to the Philadelphia Energy Authority as it pursues funding from the EPA's Climate Pollution Reduction Grants Program, which is designed to enable states, municipalities, tribes, and territories to implement ambitious measures that will achieve significant cumulative GHG reductions by 2030 and beyond, pursue measures that will achieve substantial community benefits in low-income and disadvantaged communities, complement other funding sources to maximize GHG reductions and community benefits, and pursue innovative policies and programs that are replicable and can be scaled up across multiple jurisdictions.

Our organization is a for-profit entity which is engaged in supporting the National Electric Vehicle Initiative effort to provide DC fast charging services to electric vehicle users in our area.

We intend to participate in or directly assist in the design and performance of a project that meets these four goals by running our equipment from microgrids which we are building and powering with solar energy and electric storage systems on site.

We look forward to playing a role in helping to reduce greenhouse gas emissions across Southeastern Pennsylvania with the goal of protecting human health and the environment as part of this transformative opportunity.

Sincerely,

Charles R.A. Lyddane
