RE: Letter of Commitment to Partner on Climate Pollution Reduction Implementation Grant (CPRG) -  
Accelerating Clean Energy Savings in Alaska's Coastal Communities Program (ACES – AK)

Dear Mr. Venebles:

Alaska Electric Light and Power Company (AEL&P) provides retail electric service for approximately 17,000 customers in the City and Borough of Juneau, Alaska (CBJ). We are a vertically-integrated, islanded electric utility that generates and distributes all of the retail electricity within the CBJ. **AEL&P produces 100 percent of its base-load generation through clean, renewable, and low-cost hydropower.** This is accomplished through the careful operation of five hydropower plants: Snettisham, Lake Dorothy, Annex Creek, Salmon Creek, and Gold Creek. We also maintain backup diesel generation for use during times of maintenance or low water to ensure that we can provide reliable service.

AEL&P is committed to working in partnership with the Southeast Conference on their project to accelerate clean energy savings in Alaska's Coastal Communities. We will do this by:

1. providing historic and projected electricity use information as requested,
2. sharing information and data on sub metered heat pump circuits within our service territory,
3. identifying the most cost-effective electrical service upgrades needed to serve additional loads in accordance with our tariff within the CBJ, and
4. utility coordination on project management activities.

We appreciate the Southeast Conference's efforts to reduce greenhouse gas emissions and being involved in this project. Please don't hesitate to reach out at any time.

Sincerely,

Lori Sowa  
VP and Director of Energy Services and Metering
