Central Texas Clean Civic Hubs	
Brief Description of GHG Measures	
<p>Travis County and the City of Austin propose a Greenhouse Gas (GHG) Reduction Program to retrofit community-facing municipal facilities through equipment replacement projects. The program will distribute funds to projects through a competitive grant process available to local governments across the Austin-Round Rock Metropolitan Statistical Area (MSA). Local entities will design and implement decarbonization projects in community-facing government-owned facilities, such as libraries and recreational centers.</p>	
Sector(s)	
<p>Electric Power Sector:</p> <ul style="list-style-type: none">- Installation of renewable energy and energy storage systems on municipal facilities- Targeted incentives for the installation of renewable energy and energy storage systems <p>Building Sector:</p> <ul style="list-style-type: none">- Incentive programs for implementation of end-use energy efficiency measures in existing government-owned buildings	

- Incentive programs for the purchase of certified energy-efficient appliances, heating and cooling equipment, lighting, and building products to replace inefficient products
- Programs and policies to promote electrification of government-owned facilities

Expected Total Cumulative GHG Emission Reductions

2025 – 2030: 23,081 cumulative MTCO₂e Reduced

2025 – 2050: 102,765 cumulative MTCO₂e Reduced

Location(s)

The primary locations of the project are Travis County, the City of Austin, and the Austin-Round Rock Metropolitan Statistical Area (MSA). All primary locations are within the state of Texas.
