Office of Sustainability and Clean Energy  
Attn: Ms. Maria Redmond, Director  
101 E. Wilson Street  
Madison, WI 53703

Dear Director Redmond,

The Wisconsin Local Government Climate Coalition (WLGCC) fully supports the proposed application for funding under the 2024 EPA Climate Pollution Reduction Strategy Program to reduce Greenhouse Gas Emissions (GHG) for the State of Wisconsin. The Office of Sustainability and Clean Energy (OSCE) has conducted a thorough process to determine those measures best suited for short term GHG reductions by assessing previous work completed via Governor Evers' Clean Energy Plan - among other studies and proceedings - as well as by engaging a wide variety of stakeholders, including local governments.

WLGCC provides a coordinated voice for local governments that are pursuing clean energy and climate change solutions in the state. We provide a platform for members to collaborate on overcoming barriers to decarbonization, accelerating climate change solutions and ensuring the benefits of the clean energy economy are distributed to everyone throughout the state. WLGCC members have collaborated with OSCE from the beginning of the Climate Pollution Reduction Grant Program, providing data, feedback, and recommendations to inform the State's Priority Climate Action Plan as well as this implementation grant opportunity. We look forward to working with OSCE to ensure that this grant benefits all communities across the state.

I strongly encourage the EPA to make this transformational investment to support implementation and scaling of GHG reductions in Wisconsin, while ensuring that equity and the needs of disadvantaged communities across the state are built into measure designs and program offerings. Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Allison Carlson".

Allison Carlson  
Executive Director  
Wisconsin Local Government Climate Coalition
